First Transcontinental Railroad (May 10, 1869)

Panic of 1873 - Unrestrained speculation on the railroads led to disaster - inflation and strikes by railroad workers. 18,000 businesses failed and 3 million people were out of work. Federal troops were called in to end the strike.

Corruption:

Credit Mobilier Scandal - A construction company owned by the larger stockholders of the Union Pacific Railroad. After Union Pacific received the government contract to build the transcontinental railroad, it "hired" Credit Mobilier to do the actual construction, charging the federal government nearly twice the actual cost of the project. When the scheme was discovered, the company tried to bribe Congress with gifts of stock to stop the investigation. This precipitated the biggest bribery scandal in U.S. history, and led to greater public awareness of government corruption.

Whiskey Ring - During the Grant administration, a group of officials were importing whiskey and using their offices to avoid paying the taxes on it, cheating the treasury out of millions of dollars.

Boss Tweed - Large political boss and head of Tammany Hall, he controlled New York and believed in "Honest Graft".

Tammany Hall - Political machine in New York, headed by Boss Tweed
